

# CERES GEN6

## HOW IT WORKS

- Direct-to-satellite connection
- No towers, base stations, or on-farm infrastructure required
- Real-time data delivery
- Designed for remote, scalable, and low-maintenance monitoring
- Simple deployment: activate the device, apply/attach, and start receiving insights

## DATA COLLECTION

- Reproduction - oestrus detection in beef, mounting patterns, calving alerts
- Advanced PFI algorithm updated by CSIRO, for even smarter, more accurate behavioural insights.
- Health & welfare – signs of illness, stress, or unusual behavior
- Location tracking – individual animal movement
- Grazing patterns – pasture use, land rotation insights, and efficiency
- Biosecurity alerts – early warning of potential disease or abnormal activity
- Performance insights – animal behavior and efficiency

Weighs less than 40 grams

68.93mm

74.53mm

- The only livestock tracker with IP68 accreditation. 100% waterproof!
- Built with bullet-proof polymer for years of hard knocks and use.
- UV resistant flexible tether with single pin design, secure & durable.
- Green 'bumper' added and over-moulded onto white for enhanced device protection.
- Higher spec material for enhanced UV protection & longer device life.
- One-piece front enclosure, extra protection for internal hardware.
- 'Ultrasonic' welded casing, superior sealing integrity and durability.
- Longer-lasting battery, keeping your device running when you always need it.
- Reusable, get more value, again and again.

# TURNING INSIGHTS INTO GENERATIONS OF *PERFORMANCE.*

Knowing your livestock's movement, welfare and performance is power. And utilising that insight for better management, reduced losses, and higher productivity is profit.
