S-Tag Application Instructions

1

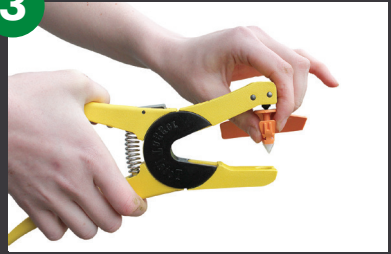

Flip out the pin to the tagging position.

2

Slide the tag onto the pin. Pull the stem of the tag straight so the pin slides right to the tip of the tag.

3

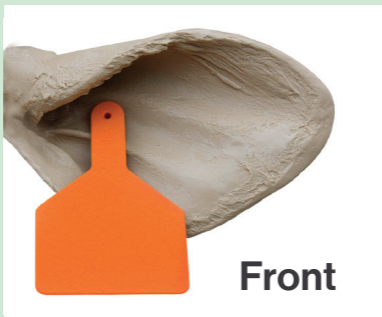

Flip the pin down and spin the tag sideways so it doesn't block your view when tagging.

4

Tag from the front of the ear. Squeeze the handles together to push the spike through the ear. Keep squeezing as you pull the applicator down and away - the pin will flip up and release the tag.

Shearwell Data is an animal identification & software management business, supporting livestock farmers in the US & around the world.

Our product ranges include cattle & sheep visual & RFID tags, RFID readers & stock recorders, weighing & drafting equipment & a growing range of husbandry products.
